

ColorFast™

Develop artistic paper presentations.

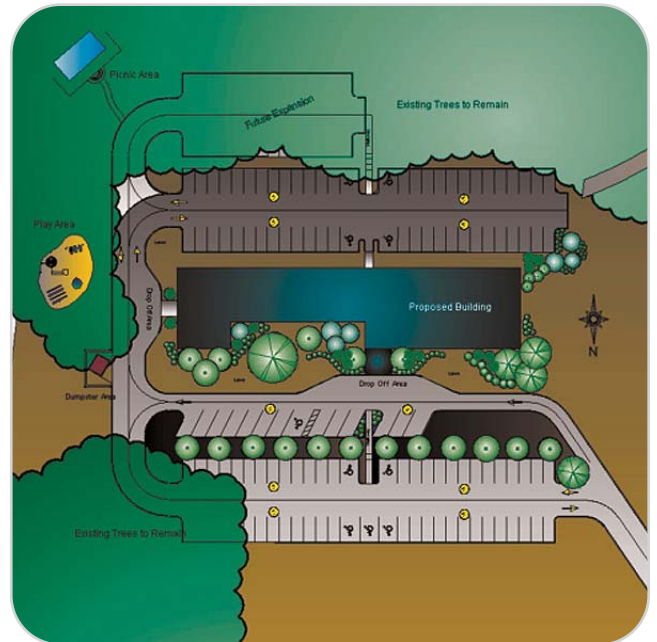

Use *ColorFast™* to apply multiple color, border and shading techniques to your designs and render them in seconds.

ADVANTAGES OVER COLORING BY HAND

With *ColorFast™* you have the ability to order visibility by layer, color fill entities by layer, adjust border width and color by layer, apply gradient shading, save configured templates and export images to popular graphic formats or print directly to your plotter/printer.

DISPLAY PRESENTATION ALTERNATIVES

If a client wants to see other display options, use *ColorFast™* to easily modify the view and quickly render it again for presentation.

"In today's fast paced software world, we are happy to find that our primary design software (Eagle Point) is staying constant in terms of the processes, yet also continuing in the many enhancements and other developments. "

- Harold Baldwin
Right-of-Way Manager
Navajo County Public Works
